

Management Decision Models

MIDTERM

Rules

take home exercise
unlimited resources, unlimited class interaction

Develop a decision model for grading students in this class. Include a discussion of the conceptual, formal, experiential, and management tools you used to develop the model.

Apply the model you develop to yourself, to generate your midterm grade for this class.

The quality of your midterm grade decision will effect your final grade. The actual grade you assign yourself will establish expectations for your performance on the Final Examination.
